# CivicTree — Hubtel UAT Submission

**Merchant:** CivicTree
**API Base URL:** `https://api.civictreegh.com`
**Server IP:** `162.254.39.23`
**Date:** July 2026

## 1. Sample Callbacks Received from Hubtel for All APIs

### API 1: Web Checkout — Payment Success Callback

**Endpoint Hit:** `POST https://api.civictreegh.com/api/orders/webhook`

Hubtel sends this to our server after a customer completes payment via the web checkout page.

```
[HUBTEL WEBHOOK RECEIVED] Payload: {
  "ResponseCode": "0000",
  "Status": "Success",
  "Data": {
    "CheckoutId": "c3b67bfc2fc94768865534f1246428f8",
    "SalesInvoiceId": "a030bf84fe0b420098a27e8f158c4393",
    "ClientReference": "#CT-1024-M720",
    "Status": "Success",
    "Amount": 0.01,
    "CustomerPhoneNumber": "233257581661",
    "PaymentDetails": {
      "MobileMoneyNumber": "233257581661",
      "PaymentType": "mobilemoney",
      "Channel": "mtn-gh"
    },
    "Description": "The MTN Mobile Money payment has been approved and processed successfully."
  }
}
```

**Our server responds with:**

```
{
  "success": true,
  "message": "Order payment verified and vouchers processed."
}
```

### API 1b: Web Checkout — Payment Failed Callback

**Endpoint Hit:** `POST https://api.civictreegh.com/api/orders/webhook`

Hubtel sends this when the customer abandons payment or it fails.

```
{
  "ResponseCode": "1001",
  "Status": "Failed",
  "Data": {
    "ClientReference": "#CT-1002",
    "TransactionId": "b61234567abc89dd91b090bfc279d8b2",
    "Amount": 80.00,
    "CustomerName": "Jane Mensah",
    "CustomerPhoneNumber": "0201234567",
    "Description": "Payment for 1 x BECE results checker voucher(s)",
    "PaymentType": "MobileMoney",
    "Channel": "mtn-gh",
    "MerchantAccountNumber": "2039838",
    "CreatedAt": "2026-07-12T11:00:00Z"
  }
}
```

**Our server responds with:**

```
{
  "success": true,
  "message": "Order marked as payment FAILED."
}
```

### API 2: USSD Direct Debit — Debit Prompt Callback (Primary Callback)

**Endpoint Hit:** `POST https://api.civictreegh.com/api/ussd/fulfillment`

After the customer approves the MoMo debit via their phone PIN, Hubtel sends a fulfillment callback to our USSD fulfillment endpoint.

```
{
  "SessionId": "session-xyz-456",
  "OrderId": "HB-ORD-202607-00123",
  "OrderInfo": {
    "ClientReference": "#CT-1010",
    "Amount": 150.00,
    "Description": "USSD Voucher Purchase Direct Debit",
    "Channel": "mtn-gh"
  },
  "ResponseCode": "0000",
  "Status": "Success",
  "TransactionId": "c72345678def90ee02c101cgd380e9c3"
}
```

**Our server responds with:**

```
{
  "success": true,
  "message": "Order payment verified and vouchers processed."
}
```

### API 2b: USSD Direct Debit — Debit Failed Callback

**Endpoint Hit:** `POST https://api.civictreegh.com/api/ussd/fulfillment`

Sent when customer declines or times out during MoMo PIN prompt.

```
{
  "SessionId": "session-xyz-789",
  "OrderId": "HB-ORD-202607-00124",
  "OrderInfo": {
    "ClientReference": "#CT-1011",
    "Amount": 80.00,
    "Description": "USSD Voucher Purchase Direct Debit",
    "Channel": "vodafone-gh"
  },
  "ResponseCode": "0010",
  "Status": "Failed",
  "TransactionId": null
}
```

**Our server responds with:**

```
{
  "success": true,
  "message": "Order marked as payment FAILED."
}
```

## 2. Sample Transaction Status Check Response

**API Used:** `GET https://api-txnstatus.hubtel.com/transactions/{merchantAccountNumber}/status?clientReference={orderId}`
**Triggered by:** Our backend at `GET https://api.civictreegh.com/api/public/purchase/verify?checkoutid={checkoutId}`

### Status Check — Paid

```
{
  "responseCode": "0000",
  "message": "success",
  "data": {
    "transactionId": "a51584487fdb43dd81a980aeb168c7a1",
    "clientReference": "#CT-1001",
    "externalTransactionId": "2607121234MTN",
    "amount": 150.00,
    "status": "Paid",
    "paymentMethod": "MTN Mobile Money",
    "paidAt": "2026-07-12T10:32:00Z"
  }
}
```

**Our API response to the frontend (after triggering fulfillment):**

```
{
  "success": true,
  "status": "SUCCESS",
  "message": "Payment verified successfully from payment provider.",
  "data": {
    "orderId": "#CT-1001",
    "paymentStatus": "SUCCESS",
    "deliveryStatus": "SENT"
  }
}
```

### Status Check — Unpaid / Pending

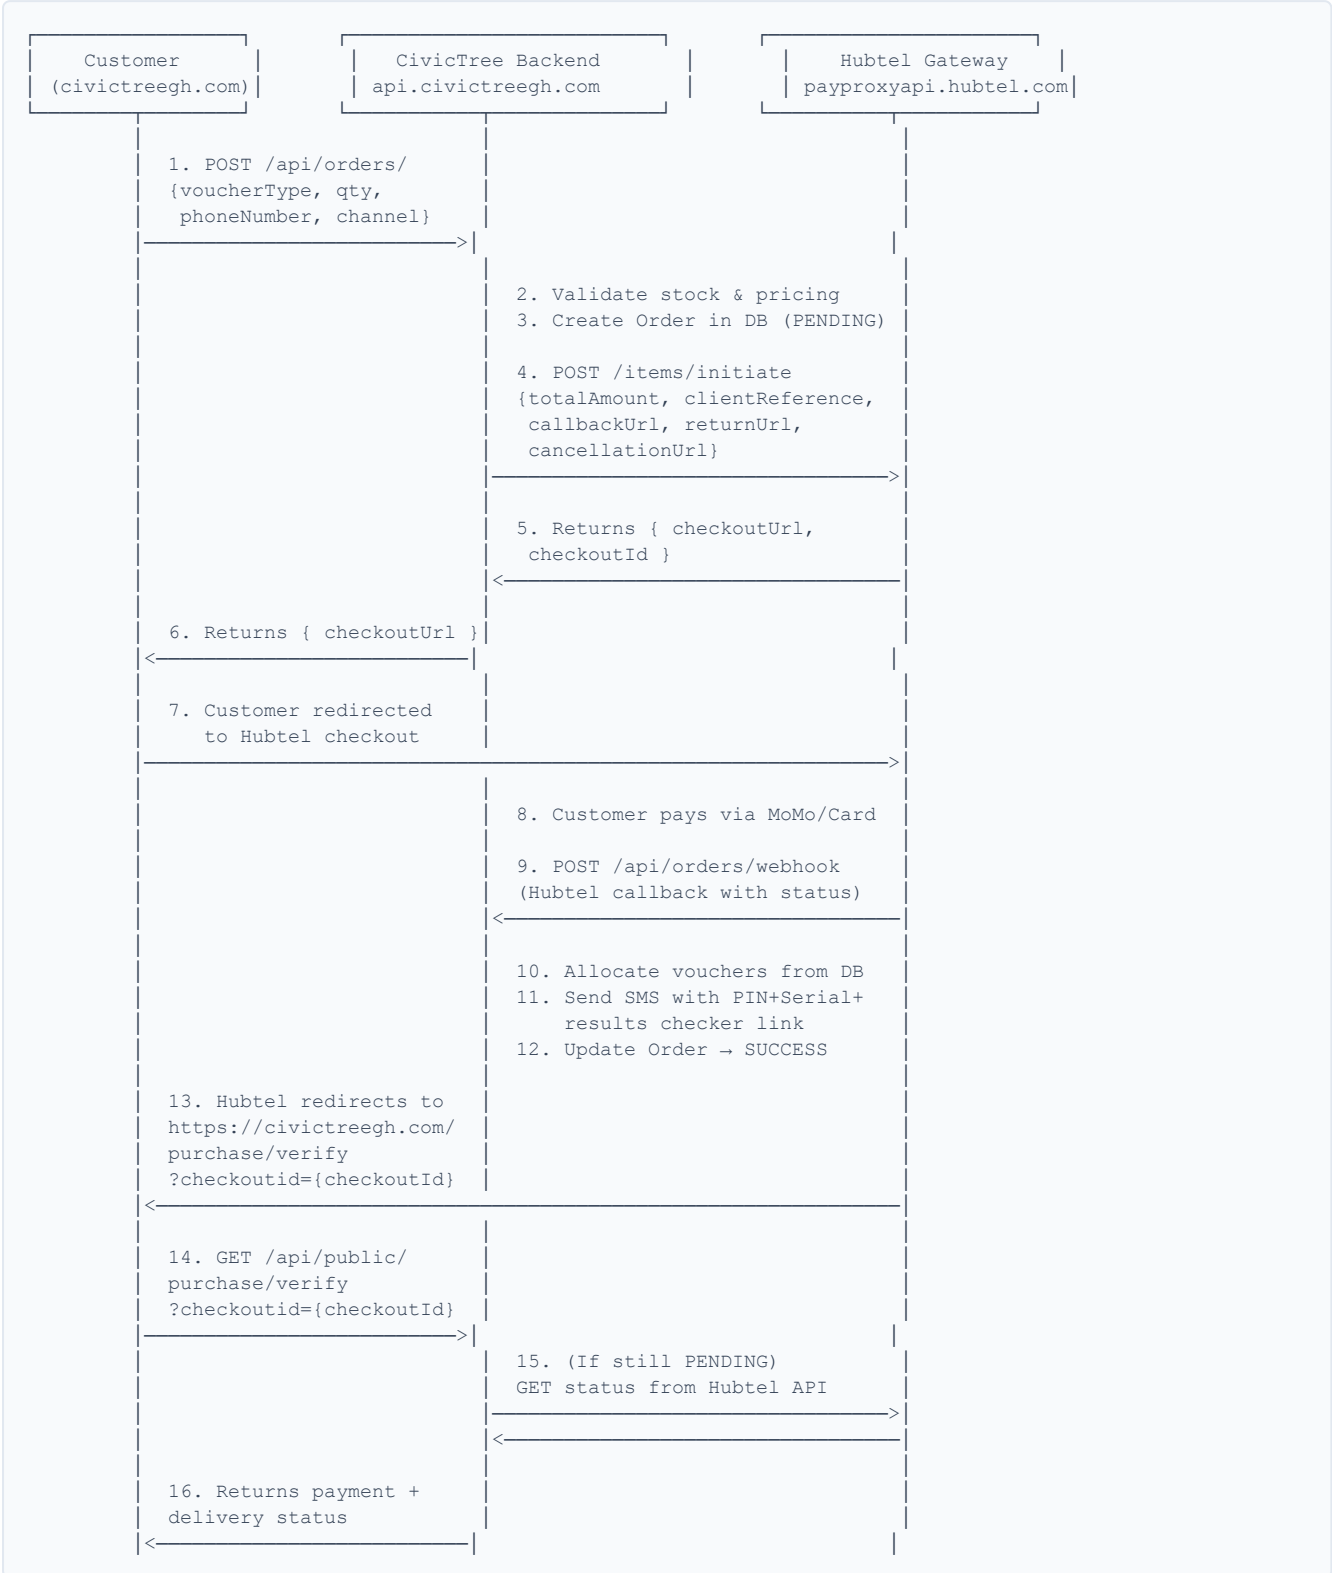

```
{
  "responseCode": "0000",
  "message": "success",
  "data": {
    "transactionId": "b61234567abc89dd91b090bfc279d8b2",
    "clientReference": "#CT-1002",
    "amount": 80.00,
    "status": "Unpaid",
    "paymentMethod": null
  }
}
```

**Our API response to the frontend:**

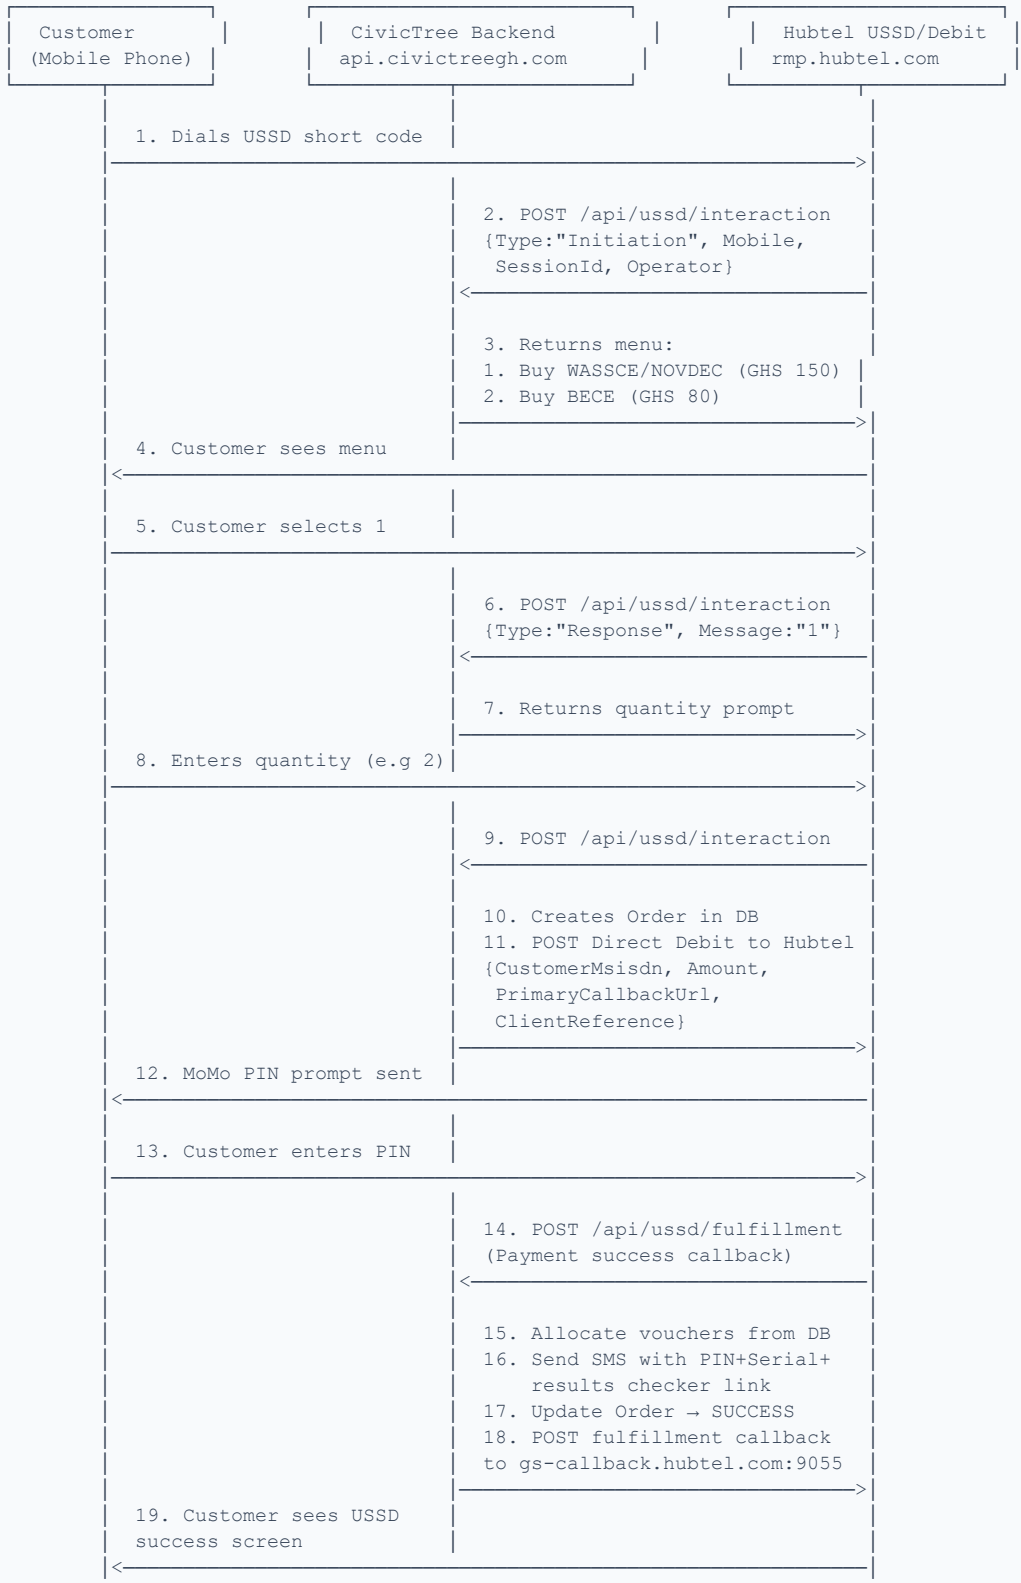

```
{
  "success": false,
  "status": "PENDING",
  "message": "Payment is still pending verification.",
  "data": {
    "orderId": "#CT-1002",
    "paymentStatus": "PENDING"
  }
}
```

## 3. Integration Flow Diagram

### Flow A: Web Checkout (civictreegh.com → Hubtel Unified Checkout)

### Flow B: USSD Direct Debit (Hubtel USSD Menu → Direct MoMo Debit)

## 4. Our API Endpoints Summary

| Method | Endpoint | Purpose |
|---|---|---|
| `POST` | `/api/orders/` | Initiate web checkout order |
| `POST` | `/api/orders/webhook` | Hubtel web checkout payment callback |
| `GET` | `/api/public/purchase/verify?checkoutid=` | Verify payment status (frontend) |
| `POST` | `/api/ussd/interaction` | Handle Hubtel USSD menu navigation |
| `POST` | `/api/ussd/fulfillment` | Receive Hubtel USSD direct debit callback |

## 5. SMS Delivery Sample

After a successful payment, the customer receives an automated SMS:

```
CivicTree | Your WASSCE/NOVDEC Voucher:
Serial: 1234567890
PIN: 987654321
Check results at: https://ghana.waecdirect.org/
Call or WhatsApp CivicTree on 0556069880 for support.
```
